

RIETVELD by rietveld

Product overview Berlin chair (1923)

Around 1923, Rietveld added two new elements to his furniture designs: asymmetry and construction using surfaces. Both elements were the result of logically reflecting upon previously attempted assignments, namely to create an open spatial structure with elements of equal value. The 'Berlin chair' derives its name from the fact that it was especially designed for the exhibition room of Rietveld and Huszar in Berlin in 1923. This chair, which is now frequently referred to as 'the plank chair', also has a mirror image design.

Product overview Berlin chair

Design:

This asymmetric chair (1st design, 1923) is now made according to his last drawing.

For its manufacture, it was decided to use high-quality oak. This very solidly constructed chair is available, in the left and right design, in the colour combination black, dark grey, grey and white.

Each chair is supplied with a chip, a number and a matching certificate.
